

AGAPAY

A PROPOSAL FOR PARISH COUNCIL

ORTHODOX CHURCH MANAGEMENT SOFTWARE

One platform for all of Orthodox parish life.

AGAPAY unifies giving, stewardship, people, ministries, sacraments, events, commerce, communications, and accounting — built together, and aware of the liturgical calendar throughout.

"And above all these things put on agapē, which is the bond of perfectness."

COLOSSIANS 3:14

THE PLATFORM

Every part of parish life, now in one place.

Giving, service, and community can all share a home on AGAPAY — not six separate tools.

LIVE

Giving & Stewardship

Tithes, recurring gifts, candles, and campaigns, with donor history, annual pledge progress, and a clear Stewardship Health picture for parish leadership.

LIVE

Koinonia

A parish feed, ministry groups, signups, prayer requests, and a parish marketplace — see every feature below.

LIVE

Directory & Households

A private, member-only directory organized by household — namedays, contact details, and ways to serve, kept current by the families who live it.

LIVE

Sacraments & Services

Self-service booking for open parish times, structured requests for baptisms and weddings needing pastoral review, and commemoration names sent to the altar.

LIVE

Bookstore & Church Commerce

Feast-day dinners, festival plates, and bookstore goods — with real checkout, per-item QR codes for guests without the app, and sales tax calculated correctly.

LIVE

Accounting

Fund accounting, journal entries, reconciliation, budgets, and year-end reporting that stay connected to the gifts, sales, and pledges that created them.

KOINONIA Every feature inside your parish's community hub

- ✓ **Parish feed** — announcements, milestones & Community Inbox notifications
- ✓ **Ministry groups** — own messaging & schedule per group
- ✓ **This Week in the Church** — liturgical calendar, feasts & fasting, synced from Google Calendar
- ✓ **Signups** — meal trains, cleaning, events & volunteer needs
- ✓ **Parish Exchange** — a marketplace to offer or request items
- ✓ **Prayer requests** — parish-wide or clergy-only, with notifications
- ✓ **Listen** — parish teaching recordings & podcast subscriptions
- ✓ **Media** — parish videos & your connected YouTube channel
- ✓ **News** — curated Orthodox news alongside your parish's own blog
- ✓ **Parish Library** — staff-curated forms, pastoral letters & faith formation resources

Every Koinonia feature requires a verified household member of your own parish — not a public forum.

Every part of AGAPAY already knows what day it is in the Church.

Fasting periods, feast days, and daily commemorations aren't a separate calendar bolted on the side. The same liturgical awareness shapes festival giving prompts, sacrament scheduling, and what a parish sees first when it opens Koinonia.

Julian & Revised Julian aware

Fasting rule, daily

Saints & commemorations

Feast-day giving prompts

WHY WE BUILT THIS

AGAPAY was not built by studying parish administration from the outside. It was built from inside the life it serves. Not software with faith bolted on — a platform for the whole reverent life of Orthodox Christians, and the parishes that carry them.

Giving Intelligence & Automated Reporting

Data and reports no spreadsheet or generic giving platform gives a parish.

SECURITY How AGAPAY protects your parish and your donors

No one can read your password — not even us

Passwords are scrambled beyond recovery the moment they're created, so even AGAPAY staff can't see them. We also block repeated guessing attempts, and every donor confirms their email before signing in.

Your parish's data is walled off from every other

Your directory, your donations, your finances — kept completely separate from every other parish on AGAPAY. No one outside your parish can see it, and staff inside it only see what their role actually needs.

A second layer of protection at login, not just a password

Anyone with administrator access must prove who they are two ways — a password, plus something like a fingerprint, Face ID, or a code from their phone. This is required for admins, not optional, and donors can turn on the same protection for their own giving account. Ten backup codes mean no one gets locked out if they lose a device.

Your card number never touches AGAPAY

When someone gives online, their card details go straight to Stripe — the same processor trusted by millions of businesses — not to us. We never see or store a card number, and every gift deposits directly into the parish's own bank account.

Every important change leaves a record

Who was added to the directory, who edited a record, who touched the books — it's automatically logged and can't be quietly changed or deleted. If a question ever comes up, there's a clear answer.

AGAPAY runs on Cloudflare, one of the internet's largest security infrastructure providers — used by roughly one in five websites worldwide — protecting AGAPAY against large-scale attacks and automated bots before they ever reach us. No system connected to the internet can promise to be completely risk-free, and we won't pretend otherwise — the full technical details are at agapay.app/give/security.

GIVING INTELLIGENCE

The real shape of parish giving — not just the total.

Every parish gets these dashboards standard, on any plan that includes Stewardship Health.

LIVE

Giving Distribution

How many donors give at each level, from under \$500 to \$10,000+ a year — the real shape of parish giving, not one total number.

LIVE

Donor Retention

Year-over-year retained, lapsed, and new donors, with a clear retention rate — an early signal of a giving problem, long before the total drops.

LIVE

Giving Concentration Risk

What share of annual giving comes from the top 5 and top 10 households — anonymized and ranked, never identified — with an automatic risk flag using standard nonprofit stewardship thresholds.

LIVE

Recurring Gift Stability

How much of total giving is recurring versus one-time, and how many active recurring donors the parish has — the real measure of predictable cash flow.

AUTOMATED REPORTING

Reports that build themselves.

What used to take a treasurer days generates in minutes, from the same records already in AGAPAY.

LIVE

Monthly Stewardship Report

An auto-generated, print-ready summary for council meetings — pledge progress, fund balances, and giving trends, always current.

LIVE

Monthly Financial Report

A companion financial report reconciled against what's actually been logged — not a manual reconstruction the week before the meeting.

LIVE

Annual Giving Statements

IRS-compliant giving statements, generated for every donor in one batch — no more building these by hand every January.

LIVE

Annual Meeting Packet Builder

A dedicated packet editor that assembles the parish's full annual meeting packet — preview it, edit it, and export a polished, print-ready PDF.

What used to take a treasurer days now takes minutes.

Every metric and every report above is generated automatically from the same gifts, pledges, and funds already flowing through AGAPAY — no exporting to a spreadsheet, no rebuilding a report from scratch before a council meeting.

Plans, Pricing & Next Steps

What it costs the parish, and how the council can move forward today.

\$0 AGAPAY donation fee

AGAPAY adds no percentage-based fee to donations on any plan. Standard Stripe processing fees still apply, and donors may choose to cover those fees so the parish can receive the full intended gift.

● One system, not six

Replaces scattered tools and duplicate records with a household-centered platform for clergy, staff, ministry leaders, and parishioners.

● Ministries can do real work

Ministry leaders can manage real parish activity and payment-taking workflows without needing full parish dashboard credentials.

● Our money, our account

Gifts and sales are processed through the parish's own connected Stripe account and deposited directly to its own bank.

● Less work for the staff

Automatic receipts, giving history, commerce records, and accounting workflows reduce repetitive administrative work.

PLANS & COST TO THE PARISH

Give

\$9/mo

Online giving, including recurring gifts — tithes, candles, and commemorations

Give + [START HERE](#)

\$79/mo

Everything in Give, plus campaigns, pledge tracking, Stewardship Health reporting, the Parish Directory, Bookstore, Parish Library & Koinonia — then add exactly what else your parish needs below.

À LA CARTE ADD-ONS — LAYER ONTO GIVE +

Pay only for the pillars your parish actually needs — flat, everyday pricing, no bundle required.

Sacraments & Services	\$9/mo
Full Commerce — Bookstore included in Give +; this adds Events & Meals	\$29/mo
Accounting Suite — includes Full Commerce	\$129/mo

AGAPAY Commerce checkout calculates applicable sales tax automatically, while the Accounting Suite records and reconciles the resulting sales, tax, fees, and deposits.

Parish

from \$149/mo

Prefer it all bundled instead of adding pieces? Parish includes every pillar at one flat, household-based rate.

Under 50 households	\$149/mo
50–149 households	\$179/mo
150–299 households	\$199/mo
300–599 households	\$209/mo
600+ households	Custom

WHAT PARISH INCLUDES — EVERY PILLAR

- ✓ Full Parish Directory & member workflows
- ✓ Full Parish Commerce & Bookstore
- ✓ Full accounting suite — funds, journals & reconciliation
- ✓ Sacraments & Services scheduling
- ✓ Koinonia — private parish community: groups, announcements & teaching
- ✓ Guided onboarding & priority support

No setup fee, no contract, and no early-adopter fine print — every tier, add-on, and household band is a flat, everyday price. Every tier and add-on can be changed at any time as the parish's needs grow.

1

Parish approves moving forward

The subscription and parish launch do not begin until the parish approves its completed configuration.

2

Staff completes setup

Guided onboarding with the parish's own verified Stripe account.

3

Launch to the parish

Share Give links, the My AGAPAY app, and Koinonia with the community.

4

Grow into Parish

Add Sacraments, Commerce, and Accounting all at once — bundled for less than buying them separately.

Canonically minded

Communities are reviewed before activation, so donors know where their gifts are going.

Human support

Real people for onboarding, parish workflows, and the practical details of launch.

Built by Orthodox Christians

For Orthodox parishes, monasteries, and the households that sustain them.
